

Sustainability Pledge

Healthy Planet = Healthy People. Our first priority is providing the best eye health care to you and your family. This care extends beyond these walls to include the planet. By ensuring we minimise our impacts, we are taking a step towards a healthier Earth and a healthier us.

Green procurement. We aim to buy products from renewable sources even if it costs more because we care about our planet and the health of its people.

Integrated waste management. We are diverting as much waste as possible away from landfill, by reducing, reusing and recycling.

Resource efficiency. More than 40% of our electricity comes from the solar panels on the roof of our clinic. We are adopting more efficient practices, such as using LED light bulbs and paperless, computer based systems.
